PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering graduate with 7+ months of hands-on internship experience in Python Backend Development, RESTful APIs, FastAPI, Flask, database-driven applications, API integration, testing, and debugging. Experience in developing backend services and automated workflows using SQL/NoSQL databases, Git, and Docker, with additional experience in NLP, Generative AI, LLM concepts, and Prompt Engineering for AI-powered applications.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript, C++, SQL, HTML5
AI / ML / NLP:	Artificial Intelligence, Machine Learning, NLP, Generative AI, Prompt Engineering, LLMs
Backend & APIs:	FastAPI, Flask, Django, RESTful APIs, OpenAPI, Web Services, JWT, HTTP
Databases:	MySQL, MongoDB, SQLite, CRUD Operations, Data Persistence
DevOps & Tools:	Git, GitHub, Docker, CI/CD, GitHub Actions, Manual Testing, Debugging

WORK EXPERIENCE

Python Developer Intern — *Druidot Consulting (OPC) Pvt. Ltd.*

Feb 2026 – Present | Remote

- Developed Python-based AI and backend applications using Flask and FastAPI, integrating RESTful APIs and data-processing workflows.
- Worked on NLP-based text processing and analysis for AI-oriented application workflows.
- Integrated Generative AI and LLM-based capabilities through AI API integrations and prompt-driven workflows.
- Built and optimized REST APIs, backend services, automation, testing, and debugging.
- Performed data validation and processing with MySQL and MongoDB, supporting reliable AI and backend workflows.

FEATURED PROJECTS

NLPCRM – AI-Powered CRM Platform (Python, FastAPI, Flask, MySQL, SQLite)

[Live App](#) | [GitHub](#)

- Designed and developed **25+ RESTful API endpoints** across contacts, NLP, email, and webhook modules.
- Integrated MySQL and SQLite for structured data persistence and database-driven workflows.
- Implemented JWT-based access control, rate limiting, and strict input validation.

ContentDesk – AI Content & Data Processing Platform (Python, Flask, SQLite)

[Live App](#) | [GitHub](#)

- Engineered shared Python/Flask backend serving web and desktop application channels.
- Developed an SEO-scoring crawler and **TF-IDF near-duplicate detection workflow**.
- Implemented **26 automated unit tests** in GitHub Actions CI pipeline.

EDUCATION

NITRA Technical Campus, AKTU — *B.Tech, Computer Science & Engineering*

Ghaziabad UP, India
May 2022 – June 2026

- **CGPA:** 7.12 / 10

CERTIFICATIONS & RESEARCH

- **Python Programming Certification** – Infosys Springboard
- **Quantitative Research Job Simulation** – JPMorgan
- Presented '*Adaptive Residual-Energy Threshold LEACH for Performance & Energy Efficiency*' at NGAISL-2026, HRIT University (Apr 2026).
